CONTENTS

Volume 39, Issue Nos. 1–24 (1996)

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

Unified Construction of Finite Element and Finite Volume Discretizations for Compressible Flows: V. Selmin and L. Formaggia 1

Optimal Design for Non-steady-state Metal Forming Processes—I. Shape Optimization Method: L. Fourment and J. L. Chenot 33

Optimal Design for Non-steady-state Metal Forming Processes—II. Application of Shape Optimization in Forging: L. Fourment, T. Balan and J. L. Chenot 51

A Fully Spectral Method for Hyperbolic Equations: P. Shukla, V. Eswaran and S. Murty Bhallamudi 67

Dynamic Analysis of a Fully Saturated Porous Medium Accounting for Geometrical and Material Non-linearities: S. Diebels and W. Ehlers 81

Investigation of Parameters Affecting Free Vibration Frequency of Helical Springs: V. Yildirim 99

Iterative Methods in Solving Navier–Stokes Equations by the Boundary Element Method: M. Hriberšek and L. Škerget 115

Eddy Current and Temperature Simulation in Thin Moving Metal Strips: H.-J. Conraths 141

A Frictional Contact Element for Strongly Curved Contact Problems: A. Heege and P. Alart 165

CONFERENCE DIARY 185

Issue No. 2

Error Estimation and Adaptivity in Elastoplasticity: L. Gallimard, P. Ladevèze and J. P. Pelle 189

Numerical Modelling of Conduction-driven Bulk Evaporation and Condensation Processes with Constant Volume: Z. Ding and S. Anghaie 219

Non-linear Structural Response using Adaptive Dynamic Relaxation on a Massively-parallel-processing System: D. R. Oakley and N. F. Knight, Jr. 235

A cumulative Author, Title and Subject Index is available at the Internet address
http://www.ep.cs.nott.ac.uk/wiley/numeng.html

Indexed or abstracted by 'Abstract Jnl. in Earthquake Engineering', 'Applied Mechanics Reviews', 'BHRA Fluid Engineering Centre', 'Boundary Element Abstracts', 'CITIS–Civil Engineering Abstracts', 'Compumath Citation (ISI)', '(CCI/Eng, Tech and Applied Sciences', 'Engineering Index Inc', 'Eng. Societies Library', 'Fluid Abstracts and FLUIDEX', 'Geodex', 'Geotechnical Abstracts', 'Indian Society of Earthquake Technology', 'INSPEC', 'Int. Petroleum Abstracts', 'Materials Information', 'Mathematical Reviews', 'Mechanics', 'Newsletter of Engineering Analysis Software', 'Research Alert (ISI)', 'Science Citation Index (ISI)', 'SCISEARCH Database (ISI)', 'Tribiology and Corrosion Abstracts', 'Zentralblatt für Mathematik'.

Efficient and Accurate Explicit Integration Algorithms with Application to Viscoplastic Models: V. K. Arya 261

Hybrid-Trefftz Finite Element Formulation for Simulation of Singular Stress Fields: J. A. Teixeira de Freitas and Z.-Y. Ji 281

Calculation of Hyperelastic Response of Finitely Deformed Elastic-viscoplastic Materials: M. B. Rubin and A. Attia 309

Implementation of the Boundary Element Method in the Dynamics of Flexible Bodies: M. Kerdjoudj and F. M. L. Amirouche 321

BOOK REVIEW 355

CONFERENCE DIARY 357

Issue No. 3

Genetic Algorithms as an Approach to Optimize Real-world Trusses: M. Galante . . . 361

Geometrically Non-linear and Elastoplastic Three-dimensional Shear Flexible Beam Element of von-Mises-type Hardening Material: M. S. Park and B. C. Lee 383

Numerical Analysis of Singularities in Two Dimensions. Part 2: Computation of Generalized Flux/Stress Intensity Factors: B. A. Szabó and Z. Yosibash 409

An Anisotropic Stress Resultant Constitutive Law for Sheet Metal Forming: C. H. Chou, J. Pan and S. C. Tang 435

On the Choice of a Derivative Boundary Element Formulation using Hermite Interpolation: K. Tomlinson, C. Bradley and A. Pullan 451

Finite Elements for Three-mode Interaction in Buckling Analysis: E. J. Barbero, L. A. Godoy and I. G. Raftoyiannis 469

FETM Vector Processing Approach in Ultimate Dynamics: A. Tesar 489

Spatial Stability Analysis of Thin-walled Space Frames: M.-Y. Kim, S.-P. Chang and S.-B. Kim 499

The Boundary Strip Method in Elastostatics and Potential Equations: O. Michael, J. Avrashi and G. Rosenhouse 527

CONFERENCE DIARY 545

Issue No. 4

Unstructured Tetrahedral Mesh Generation for Three-dimensional Viscous Flows: O. Hassan, K. Morgan, E. J. Probert and J. Peraire 549

Hybrid–Trefftz Equilibrium Model for Crack Problems: J. A. Teixeira de Freitas and Z.-Y. Ji 569

A Weak-weak Formulation for Large Displacements Beam Statics: a Finite Volumes Approximation: C. G. Franchi and F. Montelaghi 585

An Inverse Problem in Predicting Temperature Dependent Heat Capacity per Unit Volume without Internal Measurements: C.-H. Huang and J.-Y. Yan 605

Finite Element Method for Gradient Plasticity at Large Strains: X. Li and S. Cescotto . 619

Numerical Smeared Fracture Analysis: nonlocal Microcrack Interaction Approach: J. Ožbolt and Z. P. Bažant 635

Beams on Tensionless Elastic Foundation: approximate Quantifier Elimination with Chebyshev Series: N. I. Ioakimidis 663

Hypersingular Integrals: how Smooth Must the Density Be?: P. A. Martin and F. J. Rizzo 687

Application of *k*-step Lanczos Method to Extract the Interior Eigenvalues of Skeletal Systems: R. K. Singh, H. A. Smith and D. C. Sorensen 705

ANNOUNCEMENT 717

CONFERENCE DIARY 719

Issue No. 5

Robust Explicit Computational Developments and Solution Strategies for Impact Problems Involving Friction: D. Sha, K. K. Tamma and M. Li 721

Large Displacement Elastoplastic Analysis of Semirigid Steel Frames: F. Tin-Loi and J. S. Misa 741

Geometrically Non-linear Beam Element for Dynamics Simulation of Multibody Systems: I. Sharf 763

Multivariate Hermite Approximation for Design Optimization: L. Wang, R. V. Grandhi and R. A. Canfield 787

Identifying Global/Local Interface Boundaries using an Objective Search Method: S. Srinivasan, S. B. Biggers Jr. and R. A. Latour Jr. 805

Structural Optimization using a New Local Approximation Method: H. Chickermane and H. C. Gea 829

Interlaminar Shear Stress Analysis of Composite Laminate with Layer Reduction Technique: C. Y. Lee and J. M. Chen 847

Finite Element Solutions with Feedback Network Mechanism through Direct Minimization of Energy Functionals: G. Yagawa and H. Okuda 867

Management of Ground Temperature by Bang-bang Control Based on Finite Element Application: S. Suzuki, A. Anju and M. Kawahara 885

ANNOUNCEMENT 903

CONFERENCE DIARY 905

Issue No. 6

Numerical Algorithms for Solutions of Large Eigenvalue Problems in Piezoelectric Resonators: Y.-K. Yong and Y. Cho 909

Dynamic Fracture using Element-free Galerkin Methods: T. Belytschko and M. Tabbara 923

A Method of Dynamic Mesh Adaptation: R. Drake and V. S. Manoranjan 939

Two-dimensional Elastodynamic Transient Analysis by QL Time-domain BEM Formulation: C.-C. Wang, H.-C. Wang and G.-S. Liou 951

A Lagrangian–Eulerian Method with Adaptively Local Zooming and Peak/Valley Capturing Approach to Solve Two-dimensional Advection–diffusion Transport Equations: J.-R. Cheng, H.-P. Cheng and G. T. Yeh 987

The Evaluations of Cauchy Principal Value Integrals and Weakly Singular Integrals in BEM and their Applications: J. Zhu, A. H. Shah and S. K. Datta 1017

Application of the Collocation Method in Three Dimensions to a Model Semiconductor Problem: J. F. Marchiando 1029

Assumed Stress C^0 Quadrilateral/Triangular Plate Elements by Interrelated Edge Displacements: G. Shi and P. Tong 1041

Boundary Conditions for Finite Element Simulations of Convective Flows with Artificial Boundaries: J. C. Heinrich, S. R. Idelsohn, E. Oñate and C. A. Vionnet 1053

ANNOUNCEMENT 1073

CONFERENCE DIARY 1075

Issue No. 7

A Torsional Spring-like Beam Element for the Dynamic Analysis of Flexible Multibody Systems: T. M. Wasfy 1079

Formulation and Experimental Verification of a Pneumatic Finite Element: D. T. Berry and H. T. Y. Yang 1097

A Particle Tracking Technique for the Lagrangian–Eulerian Finite Element Method in Multi-dimensions: H.-P. Cheng, J.-R. Cheng and G. T. Yeh 1115

Matrix Profile and Wavefront Reduction Based on the Graph Theory and Wavefront Minimization: Y.-C. Lai, V. I. Weingarten and H. Eshraghi 1137

Post-buckling Analysis with Frictional Contacts Combining Complementarity Relations and an Arc-length Method: J. S. Koo and B. M. Kwak 1161

Unstructured Multigrid Method for Shells: J. Fish, L. Pan, V. Belsky and S. Gomaa . . 1181

Shape Sensitivity Analysis for Steady Metal-forming Processes: A. M. Maniatty and M.-F. Chen 1199

Consistent Linearization for the Exact Stress Update of Prandtl–Reuss Non-hardening Elastoplastic Models: Z. Wei, D. Perić and D. R. J. Owen 1219

Implementing Multiple Boundary Conditions in the DQ Solution of Higher-order PDE's: Application to Free Vibration of Plates: M. Malik and C. W. Bert 1237

ANNOUNCEMENT 1259

CONFERENCE DIARY 1261

Issue No. 8

A Single-domain Boundary Element Method for 3-D Elastostatic Crack Analysis using Continuous Elements: A. Young 1265

A Mixed-hybrid Finite Element Model based on Orthogonal Functions: E. M. B. R. Pereira and J. A. T. Freitas 1295

High-performance PCG Solvers for FEM Structural Analysis: P. Saint-Georges, G. Warzee, R. Beauwens and Y. Notay 1313

Feasible Descent Cone Methods for Inequality Constrained Optimization Problems: J. A. Snyman and N. Stander 1341

Numerical Reduced Minimization Theory for Beam Elements under Non-uniform Isoparametric Mapping: Min Oak-Key and Kim Yong-Woo 1357

Application of Topological Optimization Techniques to Structural Crashworthiness: R. R. Mayer, N. Kikuchi and R. A. Scott 1383

A Fast Numerical Method for Isothermal Resin Transfer Mold Filling: R. S. Maier, T. F. Rohaly, S. G. Advani and K. D. Fickie 1405

Analysis of Three-dimensional Transient Acoustic Wave Propagation using the Boundary Integral Equation Method: M. J. Bluck and S. P. Walker 1419

CONFERENCE DIARY 1433

Issue No. 9

A Formulation of the QS6 Element for Large Elastic Deformations: P. Wriggers and U. Hueck 1437

Petrov–Galerkin Methods for the Transient Advective-diffusive Equation with Sharp Gradients: S. R. Idelsohn, J. C. Heinrich and E. Oñate 1455

Generalized 3-D Paving: An Automated Quadrilateral Surface Mesh Generation Algorithm: R. J. Cass, S. E. Benzley, R. J. Meyers and T. D. Blacker 1475

A Three-dimensional Modelling of Low Velocity Impact Damage in Composite Laminates: F. Collombet, J. Bonini and J. L. Lataillade 1491

Steady Viscoelastic Flow Past a Sphere using Spectral Elements: R. G. Owens and T. N. Phillips 1517

On a Numerical Method for the Evaluation of Electromagnetic Losses in Electric Machinery: L. R. Dupré, J. A. A. Melkebeek and R. Van Keer 1535

A Continuum Model for Dynamic Damage Evolution of Anisotropic Brittle Materials: M. Yazdchi, S. Valliappan and W. Zhang 1555

A 3-D Adaptive Mesh Refinement using Variable-node Solid Transition Elements: C.-K. Choi and N.-H. Lee 1585

Approximate Discrete Variable Optimization of Frame Structures with Dual Methods: E. Salajegheh 1607

ANNOUNCEMENT 1619

CONFERENCE DIARY 1621

Issue No. 10

Boundary Element–finite Element Coupled Eigenanalysis of Fluid–structure Systems: C. Rajakumar and A. Ali 1625

A Space-time Finite Element Method for the Exterior Structural Acoustics Problem: Time-dependent Radiation Boundary Conditions in Two Space Dimensions: L. L. Thompson and P. M. Pinsky 1635

Semianalytical Singular Element and its Application to Stress Calculation and Optimization: V. P. Matveyenko and S. M. Borzenkov 1659

Hypersingular BEM for Transient Elastodynamics: R. Gallego and J. Domínguez . . . 1681

Sensitivity Analysis of Bifurcation Load of Finite–dimensional Symmetric Systems: M. Ohsaki and K. Uetani 1707

Analytical and Numerical Tests for Loss of Material Stability: H. L. Schreyer and M. K. Neilsen 1721

An Automatic Load Stepping Algorithm with Error Control: A. J. Abbo and S. W. Sloan 1737

Comparative Evaluation of Different Optimization Algorithms for Structural Design Applications: S. N. Patnaik, R. M. Coroneos, J. D. Guptill and D. A. Hopkins 1761

Source-weighted Domain Integral Approximation for Linear Transient Heat Conduction: K. Davey and S. Bounds 1775

ANNOUNCEMENT 1791

CONFERENCE DIARY 1793

Issue No. 11

C^0 Reissner–Mindlin Multilayered Plate Elements Including Zig-zag and Interlaminar Stress Continuity: E. Carrera 1797

Positively Conservative High-resolution Convection Schemes for Unstructured Elements: P. Batten, C. Lambert and D. M. Causon 1821

Combinations of the Ritz–Galerkin and Finite Difference Methods: Z.-C. Li 1839

The *p*-version of the Finite Element Method in Incremental Elasto-plastic Analysis: S. M. Holzer and Z. Yosibash 1859

High Convergence Order Finite Elements with Lumped Mass Matrix: M. S. Jensen . . 1879

Iterative Solution of Coupled FE/BE Discretizations for Plate–foundation Interaction Problems: Y. T. Feng and D. R. J. Owen 1889

A Simple and Efficient Mixed Finite Element for Axisymmetric Shell Analysis: Y. Y. Kim and J. G. Kim 1903

Strip Distributed Transfer Function Method for Analysis of Plates: J. Zhou and B. Yang 1915

A Self-scaling Implicit SQP Method for Large Scale Structural Optimization: M.-W. Huang and J. S. Arora 1933

An Overview of Recent Advances and Evaluation of the Virtual–Pulse (VIP) Time-integral Methodology for General Structural Dynamics Problems: Computational Issues and Implementation Aspects: K. K. Tamma, X. Chen and D. Sha 1955

ANNOUNCEMENT 1979

CONFERENCE DIARY 1981

Issue No. 12

Optimum Shape Design and Positioning of Features Using the Boundary Integral Equation Method: K. Tai and R. T. Fenner 1985

Hypersingular Residuals—A New Approach for Error Estimation in the Boundary Element Method: G. H. Paulino, L. J. Gray and V. Zarikian 2005

Multilevel Formulations in the Limit Analysis and Design of Structures with Bilateral Contact Constraints: R. Muralidhar, J. R. Jagannatha Rao, K. Badhrinath and A. Kalagatla 2031

Optimization Strategies in Unstructured Mesh Generation: P. D. Zavattieri, E. A. Dari and G. C. Buscaglia 2055

Mathematical Model of a Time and Position Variant External Load on a Gear Tooth Using the Modified Timoshenko Beam Equation: F. M. L. Amirouche, G. C. Tajiri and M. J. Valco 2073

Solution of the One-dimensional Convection–diffusion Equation by a Multilevel Petrov–Galerkin Method: R. Ganesan and N. J. Salamon 2095

Material Modelling for Transient Dynamic Analysis of Reinforced Concrete Structures: H. M. Farag and P. Leach 2111

Structural Dynamic Analysis by a Time-discontinuous Galerkin Finite Element Method: X. D. Li and N.-E. Wiberg 2131

CONFERENCE DIARY 2153

Issue No. 13

High-order Element for Prebuckling and Buckling Analysis of Laminated Plane Frames: I. Sheinman, M. Eisenberger and Y. Bernstein 2155

Time-domain BEM Analysis for the 2D Scalar Wave Equation: Initial Conditions Contributions to Space and Time Derivatives: J. A. M. Carrer and W. J. Mansur . . 2169

Consistent Infinitesimal Finite-element Cell Method: Three-dimensional Vector Wave Equation: Chongmin Song and J. P. Wolf 2189

Conjugate Gradient Methods for Solving the Smallest Eigenpair of Large Symmetric Eigenvalue Problems: Y. T. Feng and D. R. J. Owen 2209

A Strain-and-displacement-based Variational Method Applied to Geometrically Non-linear Shells: C. C. Celigoj 2231

Energy Balances in CVFEM and GFEM Formulations of Convection-type Problems: G. Comini, S. Del Giudice and C. Nonino 2249

An Energy-conserving Co-rotational Procedure for the Dynamics of Planar Beam Structures: U. Galvanetto and M. A. Crisfield 2265

Variable Kinematic Modelling of Laminated Composite Plates: D. H. Robbins, Jr. and J. N. Reddy 2283

Accurate Calculation of Elastic Buckling Loads for Space Frames Built Up of Uniform Beams with Open Thin-walled Cross-section: J. H. Sällström 2319

CONFERENCE DIARY 2335

Issue No. 14

High-accuracy Low-order Three-dimensional Brick Elements: S. L. Weissman 2337

A Model for Analysis of Arbitrary Composite and Porous Microstructures with Voronoi Cell Finite Elements: S. Moorthy and S. Ghosh 2363

Interelement Stress Evaluation by Boundary Elements: Z. Y. Zhao 2399

The Four-node C^0 Shell Element Reformulated: D. Briassoulis 2417

Adaptable Spline Element for Membrane Vibration Analysis: W.-H. Chen and C.-W. Wu 2457

Some Novel Developments in Finite Element Procedures for Gradient-dependent Plasticity: R. de Borst and J. Pamin 2477

CONFERENCE DIARY 2507

Issue No. 15

The Nonconforming Element Method and Refined Hybrid Element Method for Axisymmetric Solid: Chen Wanji and Y. K. Cheung 2509

Elastohydrodynamic Lubrication Analysis of Layered Line Contact by the Boundary Element Method: Y. K. Xue, D. T. Gethin and C. H. Lim 2531

Evaluation of the Stress Tensor in 3-D Elastoplasticity by Direct Solving of Hypersingular Integrals: O. Huber, R. Dallner, P. Partheymüller and G. Kuhn 2555

Direct Formulation Finite Element Method for Two-dimensional Groundwater Pollution Modelling with a Comparison with Conventional Finite Element Method: M. Ghulam Rabbani 2575

A Space-time Coupled p-version Least Squares Finite Element Formulation for Unsteady Two-dimensional Navier-Stokes Equations: B. C. Bell and K. S. Surana . 2593

A Co-rotational Formulation for 2-D Continua Including Incompatible Modes: M. A. Crisfield and G. F. Moita 2619

A Generalized Newton Method for Higher-order Finite Element Approximations in Non-linear Elasticity: P. Papadopoulos and R. L. Taylor 2635

Stress- and Rotation-based Hierarchic Models for Laminated Composites: E. Bertóti . 2647

An Implicit Time-stepping Scheme for Rigid Body Dynamics with Inelastic Collisions and Coulomb Friction: D. E. Stewart and J. C. Trinkle 2673

CONFERENCE DIARY 2693

Issue No. 16

Dynamic Response of Thin Composite Shells Experiencing Non-Linear Elastic Deformations Coupled with Large and Rapid Overall Motions: E. Madenci and A. Barut 2695

Normalized Smoothing Functions for SPH Impact Computations: G. R. Johnson and S. R. Beissel 2725

Computational Strategies for Iterative Solutions of Large FEM Applications Employing Voxel Data: B. van Rietbergen, H. Weinans, R. Huiskes and B. J. W. Polman 2743

P–adaptive Boundary Element Method for Unsteady Free–surface Flow Analysis: K. Abe 2769

A Set of Hybrid Equilibrium Finite Element Models for the Analysis of Three-dimensional Solids: J. P. Moitinho de Almeida and O. J. B. Almeida Pereira 2789

Refined Consistent Formulation of a Curved Triangular Finite Rotation Shell Element: F. van Keulen and J. Booij 2803

Asymptotic Solutions for Predicted Natural Frequencies of Two-dimensional Elastic Solid Vibration Problems in Finite Element Analysis: C. Zhao and G. P. Steven . . . 2821

Sensitivity Analysis Formulation for Three-dimensional Conduction Heat Transfer with Complex Geometries using a Boundary Element Method: S. J. Park and T. H. Kwon 2837

CONFERENCE DIARY 2863

Issue No. 17

A Variable-order Spectral Element Method for Incompressible Viscous Flow Simulation: R.-Y. Chang and C.-H. Hsu 2865

Numerical Solution of Transient, Free Surface Problems in Porous Media: V. R. Voller, S. Peng and Y. F. Chen 2889

Sensitivity Analysis for Boundary Element Error Estimation and Mesh Refinement: M. Guiggiani 2907

The Computation of Wavelet–Galerkin Approximation on a Bounded Interval: M.-Q. Chen, C. Hwang and Y.-P. Shih 2921

An Object–oriented Framework for Interactive Numerical Analysis in a Graphical User Interface Environment: B. P. Bettig and R. P. S. Han 2945

An Algorithm for Integrating the Spin on Convected Bases: G. Nefussi and N. Dahan 2973

Solid Elements with Rotational DOFs by Explicit Hybrid Stabilization: K. Y. Sze, A. K. Soh and Y. S. Sim 2987

Koiter's Analysis of Thin-walled Structures by a Finite Element Approach: A. D. Lanzo and G. Garcea 3007

Finite Element Calculation of Energy Release Rate Prior to Crack Kinking in 2-D Solids: J. H. Chang and L. P. Pu 3033

CONFERENCE DIARY 3047

Issue No. 18

Three-dimensional Transient Mold Cooling Analysis Based on Galerkin Finite Element Formulation with a Matrix-free Conjugate Gradient Technique: Li Q. Tang, K. Pochiraju, C. Chassapis and S. Manoochehri 3049

An Implicit Projection Algorithm for Simultaneous Flow of Plasticity and Damage in Standard Generalized Materials: P. K. Zysset and A. Curnier 3065

Equivalence Between Enhanced Assumed Strain Method and Assumed Stress Hybrid Method Based on the Hellinger-Reissner Principle: S. T. Yeo and B. C. Lee 3083

Space–time Spectral Element Method for Optimal Slewing of a Flexible Beam: A. Ben-Tal, P. Z. Bar-Yoseph and H. Flashner 3101

Consideration of Aging of Shotcrete in the Context of a 3-D Viscoplastic Material Model: G. Meschke 3123

Numerical Analyses of Tunnel Linings by Means of a Viscoplastic Material Model for Shotcrete: G. Meschke, C. Kropik and H. A. Mang 3145

Anisotropic Smoothing and Solution Adaption for Unstructured Grids: A. Khamayseh and A. Kuprat 3163

A General Formulation of Equilibrium Macro-elements with Control of Spurious Kinematic Modes: The Exorcism of an Old Curse: E. A. W. Maunder, J. P. Moitinho de Almeida and A. C. A. Ramsay 3175

A Modified Effective Capacitance Method for Solidification Modelling using Linear Tetrahedral Finite Elements: S. Bounds, K. Davey and S. Hinduja 3195

CONFERENCE DIARY 3217

Issue No. 19

Consistent Local Error Computations. Part I: Theory: M. C. Stylianou and B. Tabarrok 3219

Consistent Local Error Computations. Part II: FE Applications: M. C. Stylianou and B. Tabarrok 3235

R–S Adapted Arbitrary Lagrangian–Eulerian Finite Element Method for Metal-Forming Problems with Strain Localization: Somnath Ghosh and Suresh Raju 3247

Non-singular Somigliana Stress Identities in Elasticity: T. A. Cruse and J. D. Richardson 3273

Two Algorithms for Global Optimization of General NLP Problems: O. A. Elwakeil and J. S. Arora 3305

The Whisker Weaving Algorithm: A Connectivity-based Method for Constructing All-hexahedral Finite Element Meshes: T. J. Tautges, T. Blacker and S. A. Mitchell . . 3327

Total Orthogonalization of Redundants in the Force Method: V. B. Watwood 3351

Exponential Map Algorithm for Stress Updates in Anisotropic Multiplicative Elastoplasticity for Single Crystals: C. Miehe 3367

Gradient Enhanced Damage for Quasi-brittle Materials: R. H. J. Peerlings, R. de Borst, W. A. M. Brekelmans and J. H. P. de Vree 3391

CONFERENCE DIARY 3405

Issue No. 20

Optimal Delaunay Point Insertion: H. Borouchaki, P. L. George and S. H. Lo 3407

A Velocity Based Approach Including Acceleration to the Finite Element Computation of Viscoplastic Problems: N. Mole, J. L. Chenot and L. Fourment 3439

A C^0 Eight-node Membrane–shear–bending Element for Geometrically Non-linear (Static and Dynamic) Analysis of Laminates: M. Ganapathi, O. Polit and M. Touratier 3453

Unconditionally Stable Higher-order Accurate Hermitian Time Finite Elements: T. C. Fung 3475

An Object-oriented Architecture for a Finite Element Method Knowledge-based System: S. Huang, S. Nakai, H. Katukura and M. C. Natori 3497

Three-dimensional Finite Element Meshing by Incremental Node Insertion: K. Kondo 3519

Flexible Mechanisms Through Natural Coordinates and Component Synthesis: An Approach Fully Compatible with the Rigid Case: J. Cuadrado, J. Cardenal and J. García de Jalón 3535

Frequency-independent Infinite Elements for Analysing Semi-infinite Problems: Y.-B. Yang, S.-R. Kuo and H.-H. Hung 3553

ANNOUNCEMENTS 3571

CONFERENCE DIARY 3573

Issue No. 21

Modelling Strong Discontinuities in Solid Mechanics via Strain Softening Constitutive Equations. Part 1: Fundamentals: J. Oliver 3575

Modelling Strong Discontinuities in Solid Mechanics via Strain Softening Constitutive Equations. Part 2: Numerical Simulation: J. Oliver 3601

A Partial Hybrid Degenerated Plate/Shell Element for the Analysis of Laminated Composites: W. Feng and S. V. Hoa 3625

The *s*-version of Finite Element Method for Laminated Composites: J. Fish and R. Guttal 3641

A Well-conditioned Matrix for $(ku_x)_x$ with Discontinuous k: M. Rooney 3663

Modelling of 3-D Mixed-mode Fractures near Planar Bimaterial Interfaces using Surface Integrals: W. D. Keat, M. E. Erguven and J. F. Dwyer 3679

A Matrix-free Interpretation of the Non-local Dirichlet-to-Neumann Radiation Boundary Condition: M. Malhotra and P. M. Pinsky 3705

Finite Element Modelling of Internally Pressurized Closed Cell Composites: M. Ozgur, R. L. Mullen and G. Welsch 3715

A Generalized Variable Formulation for Gradient Dependent Softening Plasticity: C. Comi and U. Perego 3731

ANNOUNCEMENTS 3757

CONFERENCE DIARY 3760

Issue No. 22

A Brief History of the Beginning of the Finite Element Method: K. K. Gupta and J. L. Meek 3761

A Finite Element Formulation for 3-D Continua using the Co-rotational Technique: G. F. Moita and M. A. Crisfield 3775

A Parallel Computing Solution of Heat and Moisture Transfer in Unsaturated Soil: H. R. Thomas and C. L. W. Li 3793

A Diffuse Element-finite Element Technique for Transient Coupled Analysis: H. Modaressi and P. Aubert 3809

A Finite Point Method in Computational Mechanics. Applications to Convective Transport and Fluid Flow: E. Oñate, S. Idelsohn, O. C. Zienkiewicz and R. L. Taylor . 3839

A Flat Triangular Shell Element with Loof Nodes: P. N. Poulsen and L. Damkilde . . . 3867

A Novel Finite Element Approach to Frictional Contact Problems: M. H. Refaat and S. A. Meguid 3889

On Large Strain Viscoelasticity: Continuum Formulation and Finite Element Applications to Elastomeric Structures: G. A. Holzapfel 3903

ANNOUNCEMENTS 3927

CONFERENCE DIARY 3931

Issue No. 23

An Iterative Solution Scheme for Systems of Weakly Connected Boundary Element Equations: K. Davey and I. Rosindale 3933

New Regularization by Transformation for Neural Network Based Inverse Analyses and Its Application to Structure Identification: S. Yoshimura, A. Matsuda and G. Yagawa 3953

A Benchmark Computational Study of Finite Element Error Estimation: A. Mar and M. A. Hicks 3969

A Time-stepping Procedure for Structural Dynamics using Gauss Point Collocation: B. W. Golley 3985

Element Resequencing for Use with a Multiple Front Algorithm: J. A. Scott 3999

On the Removal of Rigid Body Motions in the Solution of Elastostatic Problems by Direct BEM: A. Blázquez, V. Mantič, F. París and J. Cañas 4021

Criteria to Achieve Nearly Optimal Meshes in the *h*-adaptive Finite Element Method: F. J. Fuenmayor and J. L. Oliver 4039

On a Mixed-hybrid Finite Element Method for Anisotropic Plate Bending Problems: N. Nataraj, P. K. Bhattacharyya, S. Balasundaram and S. Gopalsamy 4063

Symbolic Generation of a Multibody Formalism of Order *N*—Extension to Closed-loop Systems using the Coordinate Partitioning Method: P. Fisette and J. S. Samin . . . 4091

ANNOUNCEMENTS 4113

CONFERENCE DIARY 4117

Issue No. 24

Dynamic Analysis of Micro-electro-mechanical Systems: F. Shi, P. Ramesh and S. Mukherjee 4119

Augmented Lagrangian Finite-elements for Plate Contact Problems: F. Auricchio and E. Sacco 4141

A New Two-dimensional Finite Element Model for the Shallow Water Equations using a Lagrangian Framework Constructed Along Fluid Particle Trajectories: J. Petera and V. Nassehi 4159

Overhauser Triangular Elements for Three-dimensional Potential Problems using Boundary Element Methods: J. F. Durodola and R. T. Fenner 4183

Two Simple Fast Integration Methods for Large-scale Dynamic Problems in Engineering: W.-M. Zhai 4199

In- and Out-of-core BEM Equation Solver with Parallel and Non-linear Options: R. A. Białecki, M. Merkel, H. Mews and G. Kuhn 4215

A Distributed Finite Element Method for Solving the Incompressible Navier–Stokes Equations: E. de Santiago and K. H. Law 4243

ANNOUNCEMENT 4259

CONFERENCE DIARY 4260
